<https://github.com/chaitra-br> | <https://www.linkedin.com/in/br-chaitra> | www.chaitrabr.com

Frontend Developer with hands-on experience developing responsive web applications using HTML, CSS, JavaScript, and React. Strong understanding of component-based architecture, state management, and modern UI practices. Adept at translating requirements into clean, user-friendly interfaces and building scalable frontend solutions.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js

Styling & UI: Tailwind CSS, CSS Modules, Responsive Design

Design & Prototyping: Figma, Framer

Tools: Git, GitHub, VS Code, Vercel, Netlify

PROJECTS

Personal Portfolio Website

- Built a responsive personal portfolio using Next.js and CSS Modules.
- Implemented reusable components and structured navigation for multi-section content.
- Showcased projects, GitHub links, internship experience, and blogs in a clean, accessible layout.
- Ensured responsive design and consistent UI across devices.

E-commerce Frontend Application

- Developed a multi-page e-commerce frontend application with product listing, product details, and cart functionality.
- Implemented client-side routing and reusable UI components for seamless navigation.
- Managed application state for cart items, product selection, and user interactions.
- Designed responsive and user-friendly interfaces optimized for desktop and mobile views.

Job Application Tracker

- Developed a React-based web application to manage and track job applications across multiple stages.
- Implemented reusable components and handled application state using React hooks.
- Added status-based filtering and search to improve data visibility and usability.
- Designed responsive layouts ensuring consistent user experience across devices.

EDUCATION

Bachelor of Engineering (B.E.) – Artificial Intelligence and Machine Learning

2021-2025

Sri Krishna Institute of Technology, Bangalore

INTERNSHIPS

Project Intern – Kennametal India Ltd

Jan 2025 - May 2025

- Classified 3D object images using CNNs and computer vision tools in Python.
- Focused on preprocessing, training, and result evaluation.
- Improved classification accuracy through data augmentation and tuning.

ADDITIONAL INFORMATION

- Strong problem-solving and debugging skills
- Comfortable working with modern frontend workflows
- Able to quickly adapt to new tools and technologies
